

Postpartum Visit Summary

Date of service: 06/20/2024

PWH-VWC — Virginia Women’s Center

Patient Yellow Stone
DOB 10/04/1994
Encounter 06/20/2024 01:15 PM
Provider Allison Gray, MD
Location West Broad Office ,87654

Encounter Summary

Six-week postpartum follow-up after vacuum-assisted vaginal delivery (VAVD). Overall doing well. See details below for vitals, exam, procedure, and plan.

Vitals

Height	Weight	BMI	Blood Pressure
5 ft 8 in (170.18 cm)	139 lb (63.05–63.06 kg)	21.8	98/70 (sitting, right arm)

All vitals from 06/20/2024.

Allergies

No known drug allergies (NKDA).

Medications

Medication	Directions
metoprolol succinate ER 50 mg (extended-release)	1 tablet by mouth daily
cetirizine (Zyrtec)	as listed

Vaccines

Vaccination records noted; last comprehensive review on 10/29/2022. Identifying codes, lot numbers, and pharmacy store numbers redacted.

Problem List

- Migraine history; previously used rizatriptan PRN; postpartum use of acetaminophen/Excedrin.

- Hypertensive disorder.
- Adult health examination (onset 01/27/2023).

Family History

Father: history noted. Maternal grandmother: history noted.

Social History

- Never smoker; tobacco screen on 06/20/2024; no cessation counseling recorded.
- Alcohol: occasional; none since positive UPT.
- No recreational drug use. Caffeine: moderate; none since positive UPT.
- Sexually active; no barrier protection reported; parity 1.

Surgical History

Oral surgery at age 11.

GYN History

- LMP: 06/20/2024. Menses monthly: No.
- Last Pap: 08/30/2023 (within normal limits; negative GC). Abnormal Pap: No.
- Menarche: 13. HPV vaccine: Yes. STIs: No.
- Current contraception: postpartum period.

Obstetric History

Date	G	GA (wk)	Sex	Birth wt	Delivery	Outcome	Anesthesia
05/08/2024	1	39.5	M	6 lb 13 oz	Vaginal (VAVD)	Term	Regional (epidural)

SVD with 2nd-degree perineal and left labial lacerations repaired. Postpartum urinary retention initially; managed.

Review of Systems

Negative except as documented in the history of present illness.

Physical Exam

- Constitutional: well developed, well nourished; pleasant; no acute distress; ambulates normally.
- HEENT/Neck: normocephalic; EOMI; hearing intact; nose without external lesions; supple neck; trachea midline; no masses.
- Lungs/Chest: respirations unlabored.

- Abdomen: soft, non-distended; no tenderness, guarding, or masses; no hernia.
- Female GU: superficial dermal separation of perineal body (~5–6 mm) with perineal muscles visualized; introitus and vaginal aspect intact; no tenderness; dark lochia; no infection. Cervix without discharge/lesions. Adnexa: no mass; non-tender. Perineum: midline, non-tender, not enlarged.
- Skin/Neurologic/MSE: genital skin normal; normal gait; sensation and motor grossly intact; oriented ×3.

Procedure — Perineoplasty (Perineal Repair)

Indication: superficial separation of the perineal body with exposure of underlying musculature. Under sterile conditions in lithotomy, local anesthetic administered. Re-approximation performed using 4-0 Monocryl in a single figure-of-eight stitch. No complications; patient tolerated well. Post-procedure instructions provided.

Assessment & Plan

- **Postpartum care (Z39.2):** Doing well; contraception alternatives reviewed; patient declines; risks of short-interval pregnancy reviewed. Mood stable; good support; postpartum depression signs/symptoms reviewed. Pap up-to-date (2022).
- **Dysuria (R30.0):** In the context of postpartum voiding dysfunction. Prior online UTI dx; cephalexin course without improvement. Formal UA and culture collected today (on antibiotics). Hydration and precautions reviewed; will notify results.
- **Dysfunctional voiding (R39.198):** Post-VAVD bladder overdistention; no sensation to void; occasional overflow incontinence. Timed voids every 2–3 hours; nerve/stretch recovery may take weeks. Recommend Urogynecology evaluation/consult.
- **Disruption of perineal obstetric wound (O90.1):** Superficial; re-approximation completed; continue pelvic exercises; avoid heavy lifting/constipation; Sitz baths; return precautions reviewed.

Orders

Order	Specimen
Urinalysis, Complete (003772-P)	Urine
Urine Culture, Routine	Urine

Follow-Up & Sign-Off

Follow-up with Allison Gray, MD, at West Broad Office Encounter performed, reviewed, and signed on 06/20/2024 at 2:14 PM.
