

Mt. State Medicine And Rheumatology Progress Note

Patient Name:	Kandy Kane	Visit Date:	August 1, 2019
Patient ID:	18281	Provider:	Reginald Triplett, DO
Sex:	Female	Location:	Mt. State Medicine And Rheumatology
Birthdate:	June 18, 1951	Location Address:	505 Summers Street Charleston, WV 253011610
		Location Phone:	(304) 400-4900

Chief Complaint

- Follow-up visit
- Hypertension
- Diabetes
- Hyperlipidemia

History Of Present Illness

The patient is a 68 year old Caucasian/White female who has a history of an anxiety disorder, depressive symptoms, diabetes, hyperlipidemia, hypertension, and osteoarthritis. She is doing well and has no current complaints.

She denies abdominal pain, anxiety, bruising easily, chills, constipation, coughing, decreased libido, diarrhea, difficulty swallowing, difficulty walking, dyspnea, ear discomfort, facial pain, fatigue, feeling depressed, fever, headaches, hematuria, hemoptysis, joint pain, lightheadedness, low back pain, lower extremity edema, malaise, memory problems, nasal congestion, nausea, neck pain, oral ulcers, orthopnea, palpitations, paresthesias, paroxysmal nocturnal dyspnea, poor appetite, recent head injuries, rectal bleeding, reflux, skin lesions, syncope, throat pain, transient loss of neurologic function, tremor, urinary tract symptoms, vertigo, visual difficulties, vomiting, weakness, weight gain, weight loss, and wheezing.

Her blood pressure has been well controlled on the patient's current medications. She records blood pressures at home and they have been fairly well controlled. The patient's mixed lipid levels have been detailed in the laboratory reports. The patient does not check blood sugars at home. The patient has undergone a recent ophthalmology evaluation that showed no progression of disease, foot care check that was negative for ulcers or other diabetic complications, and oral hygien evaluation that was negative for diabetic complications. Her most recent HGB A1c was obtained 4 months ago and was 6.9 %. The patient's most recent urine for microalbumin was obtained 9 months ago and was notable for a increased microalbumin as detailed in the report. The anxiety disorder has been essentially unchanged since the last visit and waxing and waning in severity. The patient's mood has been improving without medication. The osteoarthritis primarily involves the shoulders and has been improving with treatment

The patient states she has been compliant with the recommended level of exercise, not been compliant with the recommended diet, and not been compliant with taking medications as prescribed.

The patient's current medications include Atelvia 35 mg oral tablet, delayed release (DR/EC), atorvastatin 20 mg oral tablet, Enteric Coated Aspirin 81 mg oral tablet, delayed release (DR/EC), irbesartan 300 mg oral tablet, ranitidine HCl 150 mg oral tablet, Synjardy XR 5-1,000 mg oral tablet, IR - ER, biphasic 24hr, and Vitamin D3 2,000 unit oral capsule. The medication(s) have been effective. The patient states the current medications are well tolerated without any associated adverse effects.

The patient has not been seen by any other care providers since the last visit.

The patient has not undergone any interval lab work, imaging studies or tests since the last visit.

8/1/19 - Was started on Lexapro last visit but changed pharmacies and never got it. Also put on Synjardy last visit and tolerating well.

Review of Systems**Constitutional**

- o Denies : fatigue, fever, chills, weight loss, weight gain

Eyes

- o Denies : impaired vision, blurred vision, changes in vision

HENT

- o Denies : headaches, lightheadedness, nasal congestion, nasal discharge

Breasts

- o Denies : lumps, tenderness, swelling, abnormal changes in breast size

Cardiovascular

- o Denies : chest pain, irregular heart beats, syncope, dyspnea on exertion, lower extremity edema

Respiratory

- o Denies : shortness of breath, wheezing, cough

Gastrointestinal

- o Denies : nausea, vomiting, diarrhea, constipation, abdominal pain, blood in stools

Genitourinary

- o Denies : urgency, frequency, dysuria, nocturia

Integument

- o Denies : rash, itching, new skin lesions, changes to existing skin lesions or moles

Neurologic

- o Denies : muscular weakness, incoordination, tingling or numbness, speech difficulties

Musculoskeletal

- o Admits : limitation of motion
- o Denies : joint swelling, muscle pain, shoulder pain

Endocrine

- o Denies : polyuria, polydipsia, cold intolerance, heat intolerance, weight gain

Psychiatric

- **Admits** : anxiety, depression, difficulty sleeping

Heme-Lymph

- **Denies** : lightheadedness, easy bleeding, easy bruising

Allergic-Immunologic

- **Denies** : sinus allergy symptoms, allergic dermatitis

Vitals

Physical Examination**Constitutional**

- **Appearance** : well-nourished, well developed, alert, in no acute distress, well-tended appearance, normal body habitus

Head and Face

- **Face** :
 - **Inspection** : no facial lesions

Eyes

- **Vision** :
 - **Acuity** : visual acuity grossly normal at distance O.U., near vision grossly intact O.U.
- **Conjunctiva** : conjunctiva normal
- **Sclera** : sclera white
- **Pupils and Irises** : *right pupil dilation present*, pupils reactive to light bilaterally, iris pigmentation normal, iris shape normal
- **Eyelids/Ocular Adnexa** : eyelid appearance normal, no exudates present, eye moisture level normal

Ears, Nose, Mouth and Throat

- **Ears** :
 - **External Ears** : no auricle lesions present, no auricle tenderness to palpation present, external auditory canal appearance within normal limits, no external auditory canal lesions present, no discharge present, no external auditory canal tenderness, no mastoid tenderness or discoloration present
 - **Otoscopic Examination** : tympanic membrane appearance within normal limits bilaterally, tympanic membrane color normal
 - **External Nose** : appearance normal
 - **Hearing** : intact to conversational voice both ears
- **Nose** :
 - **Intranasal Exam** : mucosa within normal limits, vestibules normal, no intranasal lesions present, septum midline
 - **Nasopharynx** : no lesions or inflammation
- **Oral Cavity** :
 - **Oral Mucosa** : oral mucosa normal without pallor or cyanosis
 - **Lips** : lip appearance normal
 - **Teeth** : normal dentition for age
 - **Gums** : gums pink, non-swollen, no bleeding present
 - **Tongue** : tongue appearance normal
 - **Palate** : hard palate normal, soft palate appearance normal
- **Throat** :
 - **Oropharynx** : no inflammation or lesions present, tonsils within normal limits

Neck

- **Inspection/Palpation** : normal appearance, no masses or tenderness, trachea midline, no deformities
- **Range of Motion** : range of motion within normal limits
- **Thyroid** : gland size normal, nontender, no nodules or masses present on palpation
- **Jugular Veins** : no JVD

Respiratory

- **Respiratory Effort** : breathing unlabored, no accessory muscle use
- **Auscultation of Lungs** : normal breath sounds

Cardiovascular

- **Heart :**
 - **Auscultation of Heart :** regular rate, normal rhythm, no murmurs present, normal S1, normal S2
- **Peripheral Vascular System :**
 - **Carotid Arteries :** normal pulses bilaterally
 - **Abdominal Aorta :** aortic pulse normal without bruits
 - **Pedal Pulses :** pulses 2+ bilaterally
 - **Extremities :** no edema, no cyanosis, no purpura present, normal capillary refill, no varicosities present

Gastrointestinal

- **Abdominal Examination :** abdomen nontender to palpation, normal bowel sounds, tone normal without rigidity or guarding, no masses present, no abdominal bruits present, no rebound tenderness present, no incisions present, abdominal contour scaphoid
- **Liver and spleen :** no hepatomegaly present, liver nontender to palpation, spleen not palpable

Musculoskeletal

- **Spine :**
 - **Inspection/Palpation :** no spinal tenderness or misalignment, leg raise test negative, no CVA tenderness noted
 - **Range of Motion :** spine range of motion normal
 - **Muscle Strength/Tone :** paracervical and neck muscle strength within normal limits
- **Right Upper Extremity :**
 - **Inspection/Palpation :** no tenderness to palpation, no edema present, no joint erythema or warmth, no joint deformities
 - **Range of Motion :** range of motion normal, no joint crepitus present, no pain with joint motion
 - **Tests and Signs :** All tests for rotator cuff, subacromial and AC joint pathology negative, no pain on provocative testing of elbow, Tinel's sign, Phalen's and Adson's tests negative
- **Left Upper Extremity :**
 - **Inspection/Palpation :** no tenderness to palpation, no edema present, no joint erythema or warmth, no joint deformities
 - **Range of Motion :** *range of motion moderately restricted*, no joint crepitus present, no pain with joint motion
- **Right Lower Extremity :**
 - **Inspection/Palpation :** no joint or limb tenderness to palpation, no edema present, no joint erythema or warmth, no joint effusions noted, no joint deformity present, DIABETIC FOOT EXAM NORMAL
 - **Joint Stability :** joint stability within normal limits
 - **Range of Motion :** range of motion normal, no joint crepitations present, no pain on motion
- **Left Lower Extremity :**
 - **Inspection/Palpation :** no joint or limb tenderness to palpation, no edema present, no joint erythema or warmth, no joint effusions noted, no joint deformity present, DIABETIC FOOT EXAM NORMAL
 - **Joint Stability :** joint stability within normal limits
 - **Range of Motion :** range of motion normal, no joint crepitations present, no pain on motion

Skin and Subcutaneous Tissue

- **General Inspection :** no rashes present, no lesions present, no areas of discoloration, no multiple lesions present, skin turgor normal
- **General Palpation :** no skin or subcutaneous tissue masses present, no tenderness to palpation

Neurologic

- **Mental Status Examination :**
 - **Orientation :** oriented to person, oriented to place, oriented to time
- **Cranial Nerves :** cranial nerves grossly intact
- **Sensation :**
 - **Light Touch :** sensation intact to light touch in extremities
- **Gait and Station :** normal gait, able to stand without difficulty

Psychiatric

- **Mood and Affect :** mood normal, affect appropriate

Results**In-Office Procedures****Lab procedure****HgA1C, In office (83036QW)**

- HgA1C: 6.0 %, Range 4.8 - 5.6

Assessment

- Benign Essential Hypertension 401.1/I10
- Hyperlipidemia 272.4/E78.5

Plan

Orders

- General health panel (CMP, CBC, TSH) - 272.4/E78.5, 401.1/I10 - 08/01/2019
- ALBUMIN URINE, MICROALBUMIN, QUANTITATIVE, Labcorp #140285 (82043, 82043, 82043, 82043, 82043, 82043) - 272.4/E78.5, 401.1/I10 - 08/01/2019
- Body mass index (BMI), documented (PV) (3008F, 3008F, 3008F) - V85.21/Z68.25 - 08/01/2019
- MOST RECENT HEMOGLOBIN A1C (HBA1C) LEVEL LESS THAN 7.0% (DM) (3044F) - 250.00/E11.65 - 08/01/2019
- DILATED RETINAL EYE EXAM WITH INTERPRETATION BY AN OPHTHALMOLOGI (2022F) - 250.00/E11.65 - 08/01/2019
- NEGATIVE MICROALBUMINURIA TEST RESULT DOCUMENTED AND REVIEWED (D (3061F) - 250.00/E11.65 - 08/01/2019

Medications

- atorvastatin 20 mg oral tablet
SIG: take 1 tablet (20 mg) by oral route once daily at bedtime for 30 days
DISP: (30) tablets with 11 refills
Refilled on 08/01/2019
- irbesartan 300 mg oral tablet
SIG: take 1 tablet (300 mg) by oral route once daily for 30 days
DISP: (30) tablets with 11 refills
Refilled on 08/01/2019
- Lexapro 10 mg oral tablet
SIG: take 1 tablet (10 mg) by oral route once daily for 30 days
DISP: (30) tablets with 2 refills
Discontinued on 08/01/2019

Instructions

- Shingrix and Hep A #1 given today - repeat in 6 months.

Disposition

- Call or Return if symptoms worsen or persist.
- Return Visit Request in/on 6 months +/- 0 days (63696).
